

Living in a world that can often make us feel alone, we wanted to celebrate the vibrant diversity of our student body, where unique backgrounds, cultures, and perspectives come together to create one united community. As you flip through every page of **Mosaic in Motion** it clearly shows the strengths found in our differences and the powerful connections that make us one.

With this theme, we set out to capture not just the major events that took place this year, but also the growth of Southeast as a whole. As high schoolers, we all face challenges that can feel isolating or overwhelming.

However, within these halls, we become part of something greater: a moving mosaic, where every person is a crucial piece. Early mornings, hallway laughter, classroom debates, victories, and heartbreaks have added color and shape to this **ever-lasting masterpiece**.

This year's theme, Mosaic in Motion, isn't just a theme.

It's a proof of our growth and the beautiful way our stories blend together. Every class, every club, every team, every late-night rehearsal, every early practice, and every hour of dedication has kept our Mosaic in Motion, reminding us in even our most challenging movements, we are **never truly alone**. No matter what elementary school you started at or where you're headed to, Southeast will always be the place where our stories came together, our identities were honored, and our unity shined.
