

SUN FUN! DONE

Summer is now over we asked 6 students where they have gone visit. We also sent out a survey to 38 randomly selected students about their summer preferences.

Summer TUNES

In a Google form, we surveyed how they connect with these songs and what it meant to listen to these songs

"I don't really know how it makes me feel, it's a deep song, and I think she sounds really good when she sings it." **Norah Hilger (9)** The subway by chapel roan.

"I resonate with this song because it's saying don't be like everyone else" **Logan Mollo (11)** Know ur enemy by rage against the machine

"my friend introduced me to this song so it makes me feel like I have a strong relationship with my friend." **Luke Sears (11)** Hotel Key by Old Dominion

Artist Statement: I created a map of the United States with locations of where people visit over the summer. I first created a sketch of how I wanted it to look. I then downloaded a picture of a map of the United States so I could make the map accurate. I then uploaded it to Ibis Paint and created another layer on top. I traced out the borders of the states in blue. I drew the location checkmarks in a separate template. I also hand-drew all of the doodles and art for each individual box (popscicle, etc). I took the photo of each student, and gathered all of the information. Overall, this project took me about 3 days. I also created the font for the word "fun," by drawing the word in my own handwriting. I wanted to draw this map because I wanted to at a visual aspect to my page instead of just having locations listed on a page.

Student Name: AJ Nightingale
