

Yearbook Theme Writing

4 years ago...

The final fixtures, installations, and landscaping was completed on the sixth high school in Lincoln. In 2022, the class of 2026 walked through door 18 as brand new freshmen into an equally unpresented school. It's been four years, are you for real? Though it went by in the blink of an eye, we've managed to build something that will last. Not only the building and the students, but the legacy, the traditions, and the falcon spirit. An achievement that encourages people to reflect on their own realities. An unreal experience. One that can make you ask ...“are you 4 REAL?”

Canceling the first year of varsity football...are you serious?

Winning district one act and baseball the second year...remarkable!

Being at maximum capacity of students in the third year...how is that possible?

And now the first year of graduating seniors who began at Northwest as freshman...are you for real?!

The days of the last four years might've been long as you've sat in class, exhausted and watching the clock and hoping it moves just a little faster. But, the years went by fast, maybe too fast. The calendar slowly creeps closer to the finish of the year, and we all think “are you 4 real?” as we reflect on the last four years, or prepare for the rest. After all of that, it is time to walk out of door 18 for the last time not just as a senior, but as the clueless freshman we once were.
