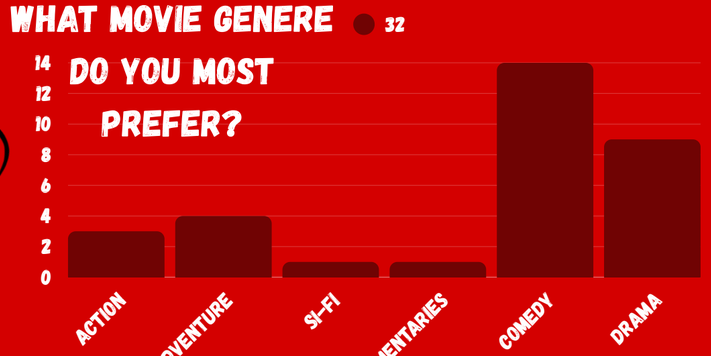
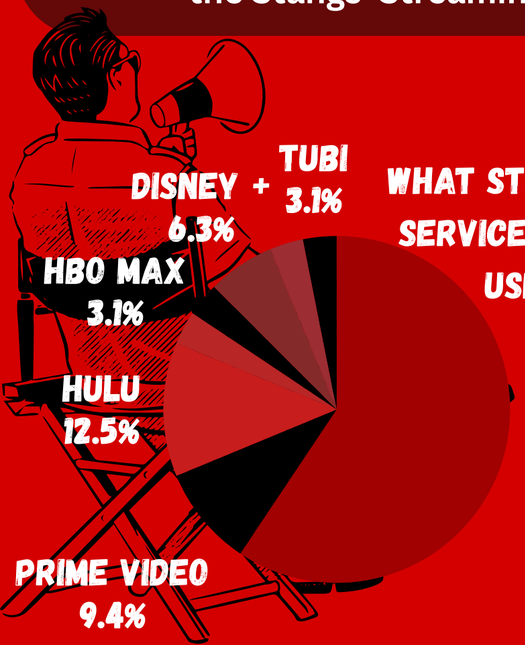
STANGS' STREAMING

Streaming is at the center of our society today; from movies, to TV Shows, to short videos. Everyday I come into school, all I hear is, "Did you watch the new episode of Stranger Things"? Or, "Did you see that Margot Robbie is in the new "Wuthering Heights" movie?" Streaming has created an increased ability to talk about our favorite soap operas and learning that others enjoy our intrests too, which helps us build connections. McCool Junction Student Media wanted to know more about the streaming habits of the Mustang Family. After gathering data from McCool students and staff, this infographic highlights the Stangs' Streaming Stats.

WHAT MOVIE GENERE DO YOU MOST PREFER?



ARE YOU A SHOW BINGER OR A SHOW HOPPER?

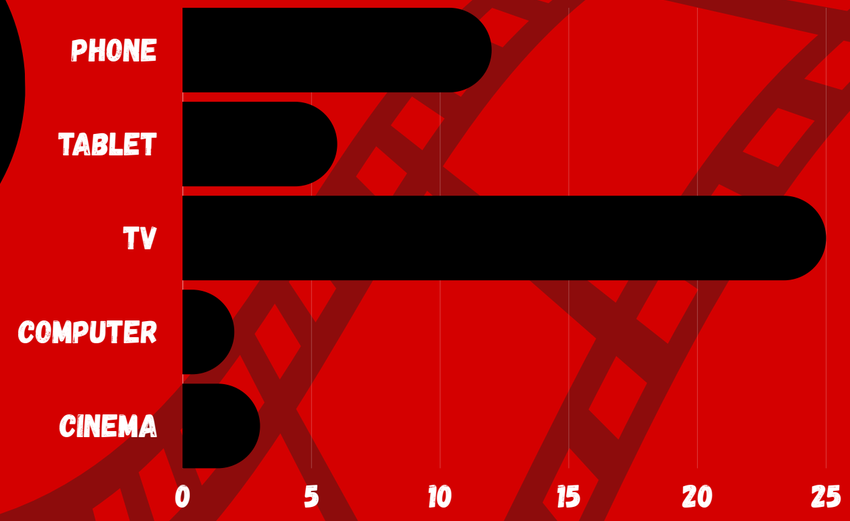


WHAT STREAMING SERVICE DO YOU USE?

HOW LONG DO YOU USE YOUR STREAMING SERVICES?

DO YOU WATCH MOVIES/TV FOR SPECIFIC ACTORS?

WHERE DO YOU WATCH YOUR MOVIES ON?



Infographic - Camille Chambers

Artist’s Statement:

I started this streaming infographic by sending out a Google form to all of the 5th - 12th graders, plus all staff members in McCool Junction school. I waited a little over a week for responses to come in and ended up with 32 responses in total. After that, I created a presentation slide on Canva and decided my theme would be red, black and white due to the majority of the responses saying they chose Netflix over the other streaming platforms. Next, I decorated my graphic with movie themes like camera reels, a movie poster, a director, and two theater masks. Then, I input my responses from the Google form to my presentation by adding different graphs that would present each piece of information from each specific question in the most effective way. I then changed their color in order to fit my theme, then adjusted their placement for adequate spacing and readability of the data and content.Lastly, I wrote a paragraph informing why I chose to do an infographic on streaming. I used the element, text box and position toggles while doing this project.
